## ECLACTIVE CONCEPT

Eclactive Concept is an innovative concept with results that comes forth of a perfect synergic action between the Dermocosmetics and the Light:

- **The DERMOCOSMETICS are BOOSTED BY THE LIGHT**
- **The BIOSTIMULATING ACTION OF THE IR (INFRARED) is multiplied by the COSMETICS**

### What do you get from the synergic action between the Dermocosmetics and the Light?

- Enhancement of perceptibility of the cellular membrane for the active cosmetic ingredients, due to the IR (INFRARED) light action: **OPTIMIZATION OF THE EFFICIENCY OF THE DERMOCOSMETIC PRODUCT.** (Pict. 1)
- Enhancement of the contribution of nutrients and oxygen to the cells by the IR (infrared) light and the greater nourishment by the cosmetics, inserted in the micro cycle thanks to the “photoporation” by the red light: **GREATER NOURISHMENT OF THE SKIN/OPTIMIZATION OF THE EFFICIENCY OF THE TREATMENT.**(Fig. 1)
- Enhancement of the cellular metabolism stimulated by the IR (infrared) light and supported by the biotechnological extract of the alga *Euglena Gracilis*, present inside the Eclactive products, that is to say, enhanced cellular energy, greater production of the macro molecules, like collagen and elastin: **GREATER TISSUE FIRMNESS, ELASTICITY AND TONE/OPTIMIZATION OF THE EFFICIENCY OF THE TREATMENT.** (Pict. 2)
- Protection of the cells thanks to the activation of the reparative processes of the DNA stimulated by the IR (infrared) light and the antioxidant-anti free radicals action of the vitamins contained in the Eclactive Dermocosmetics, that helps prevent the aging, chronological as well as induced and contrasts all signs of aging: **PRO-AGE EFFECT.**

**ECLACTIVE CLEANSING PRODUCTS** prepare the skin to “receive the light”:

- **CLEANSING EMULSION:** liberates the pores from impurities enabling the passage of light
- **TONIC GEL:** rebalances the physiological conditions of the skin and transports the light
