Relation on Zerofat usage.

In those last 3 years of activity using Zerofat, we have treated more than 50 persons.

Some of them with not to much sessions, 5, and other with 10 or 20 sessions.

During the starting sessions, patients have lost 2-3 Kg of weight, until 10 Kg and more, after 6 months of treatments.

The most impressive thing is that the skin change completely, it is more tonic, smoothing, it appears like a silk tissue, the body shape change, the patient feel itself full of vitality, energy and deflated.

Thanks to the bioelectric impedance, it has been possible to evaluate the percentage of water, fat and proteins into the body.

We have seen that with the Zerofat it is possible to reduce fat, while there is an increase of the percentage of the water and proteins, this grant a preservation and strengthening of the basal methabolism, moreover it demonstrate that not “only water” has been lost, thing that can happens in most of the slimming treatment.

To conclude, Zerofat reduce the body fats, improving the body tone, the smoothness, the blood circulation and the cell viability.
